Professional Summary

MSc candidate in Computer Engineering and Postgraduate in Artificial Intelligence Engineering with over 15 years of experience designing and delivering enterprise-scale data, analytics, and distributed systems solutions across banking, insurance, retail, telecommunications, and public sector environments. Specialized in scalable Lakehouse and Data Platform architectures using Microsoft Fabric, Azure, AWS, GCP, Hadoop ecosystems, Spark, Kafka, Databricks, and enterprise Data Warehousing strategies. Strong expertise in distributed ETL/ELT pipelines, cloud-native analytics, real-time processing, machine learning lifecycle management, and AI-driven architectures. Led mission-critical modernization initiatives for organizations including NTT DATA, Santander, Inditex, Bradesco, and HDI Insurance, driving secure, high-performance analytical ecosystems with strong governance, resilience, and scalability standards.

Core Expertise

- Microsoft Fabric, Azure, AWS, Google Cloud Platform (GCP)
- Lakehouse Architecture, Medallion Architecture & Data Warehousing
- Apache Spark, PySpark, Hadoop, Hive, Kafka & Databricks
- SQL Server, Oracle, MySQL, Cosmos DB, MongoDB & Teradata
- Machine Learning, MLflow, AI Agents & Advanced Analytics
- Distributed ETL/ELT Pipelines & Real-Time Data Processing
- Docker, Jenkins, CI/CD, DevOps & Infrastructure Automation
- Microservices Architecture & Event-Driven Systems
- Data Governance, Security, Encryption & Scalable Infrastructure

Professional Experience Highlights

NTT DATA Europe & Latam — Data Architect (2023 – Present)

- Designed and implemented enterprise-scale Lakehouse architectures using Microsoft Fabric and Medallion Architecture.
- Built distributed ingestion, transformation, and orchestration pipelines for highly regulated environments.
- Developed scalable Data Warehouse solutions integrating SQL Server, Oracle, SAP, and cloud ecosystems.
- Implemented machine learning workflows with MLflow and AI-driven analytical solutions.
- Led architecture governance, modernization initiatives, and enterprise data strategy programs.

Santander Technology — Lead Technology Engineer / Data & Analytics (2020 – 2022)

- Modernized enterprise data architecture using distributed ETL/ELT pipelines and Kafka-based ingestion systems.
- Administered and optimized Hadoop clusters supporting large-scale banking workloads.
- Integrated Data Lake and Data Warehouse ecosystems under strict governance and security requirements.
- Acted as technical lead driving architectural decisions and platform scalability.

Bradesco, HDI Insurance, Votorantim Bank & Dotz (2018 – 2020)

- Delivered enterprise integrations, microservices architectures, and scalable analytical systems.
- Worked with Java, Spring Boot, Docker/OpenShift, SQL Server, Oracle, and Google Cloud.
- Implemented large-scale ETL pipelines, enterprise APIs, BRMS solutions, and analytics platforms.

PegaProjetos & Earlier Experience (2003 – 2018)

- Managed Hadoop clusters using Cloudera and Hortonworks distributions.
- Implemented Big Data solutions with Spark, Sqoop, Azure HDInsight, AWS, and Machine Learning frameworks.
- Developed full-stack and data-driven applications across enterprise and startup environments.

Education

- Master’s Degree Candidate in Computer Engineering — Polytechnic Institute of Viana do Castelo (2025 – 2026)
- Postgraduate Specialization in Artificial Intelligence Engineering — Vincit College (2024 – 2025)
- Computer Engineering — UNIP Universidade Paulista (2006 – 2011)
- Systems Development for Web & Mobile — Salesian University Center of São Paulo (2016 – 2017)

Certifications

- Oracle DBA – Optimization & Performance
- GenAI Academy: Yellow Belt Level 1
- SAP BusinessObjects Web Intelligence
- Technical Degree in Information Technology
